RAZOR
Linear LED

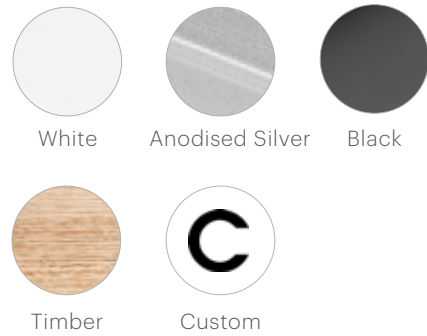

Meet Our Razor Linear LED Profiles

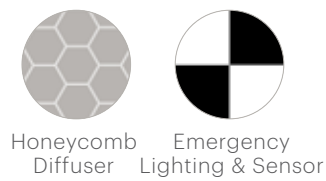

Razor by Caribou is a collection of commercial grade Linear LED profiles custom fabricated to suit any project's requirements. These profiles are available in a number of different sizes, outputs and finishes with various optional accessories. The Razor collection has profiles that can be Suspended, Surface Mounted, Wall Mounted or Recessed. The collection offers finishing options including but not limited to Anodised Silver, White, Razor Black Edition and Razor Timber.

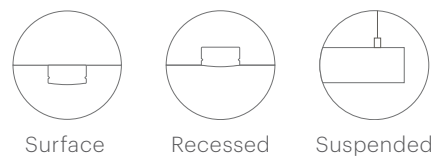

Available Finishes

Available Accessory

Mounting Options

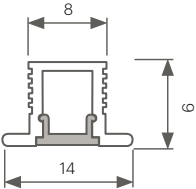

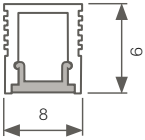

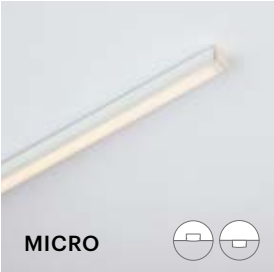

Available Finishes

Razor Micro

Razor Micro is the petite profile of the Caribou Razor family. It's compact nature makes it perfect for tight spaces, particularly joinery applications. Available in two profile designs, facilitating both surface mounted and recessed.

Razor Micro is a great solution for shelves. It's compact slim design almost makes Micro disappear yet still delivering adequate illumination with a 6W/m (450lm/m) LED inside. For curved shelving, consider the ZigZag Mini (10 x 10 mm) for a similar result.

TIP

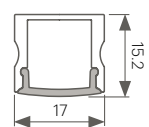

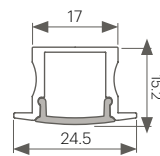

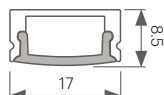

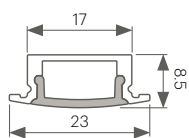

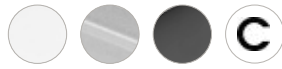

The latest trends in stair lighting show linear LED lighting used in stair treads and handrails. Razor Micro is perfect for these applications due to its compact size and impressive output.

Razor 1-4

MINI PROFILES

The Caribou Razor Mini LED profiles are built to your specific project requirements. An assortment of different aluminium profile designs are available to suit your application, including Surface Mounted, Recessed, Angled and Trimless. Caribou also offers the Razor Black Edition, which is a unique diffuser system that is blacked out when off, but illuminates a white light when on.

Available Finishes

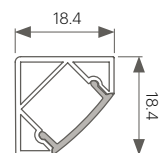

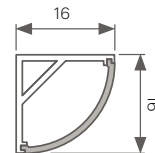

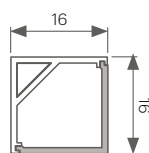

Razor 5-7

CORNER PROFILES

Razor Corner Profiles are surface mounted and are custom built to your project specifications. Razor 5 and 6 are ideal for wall washing as they host a diffuser on two sides. Razor 7 is a true asymmetric LED extrusion with the LED positioned on a 45 degree angle, allowing you to push the light where you need it most.

TIP: The Razor corner profiles are great for wardrobe applications. The 45° angle of the profile allows for the light to get where you need it most; on the clothes, shoes and accessories.

When designing the robe, be sure to ask for a fascia board concealing the Razor corner profile for an ultimately discreet result

Available Finishes

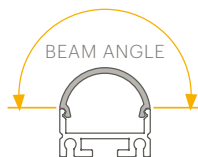

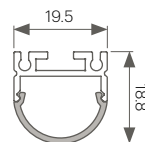

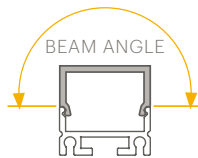

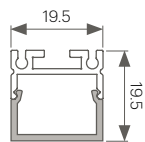

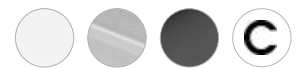

Razor 8 & 10

The Razor 8 & 10 profiles are solution based custom LED profiles, customisable in size, output and finishes. Razor 8 & 10 are perfect for those applications where you need more light. These profiles can accommodate up to 20W per metre.

Available Finishes

Razor Max 1-4

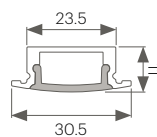

A versatile linear LED solution custom fabricated to meet specific project requirements. An assortment of profiles fall under the Razor Max category with a variety of power outputs, colours and finishes with the ability to surface mount, recess or suspend the systems.

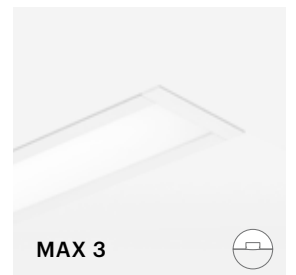

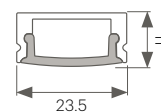

TIP: The larger profile size of the Razor Max 1 & 2 provides a more proportional solution for those applications with higher ceilings or larger joinery details, whilst maintaining a low profile in design. With the extra size, higher output LED can also be used and thermally managed for longevity of the light source.

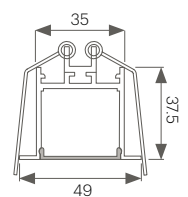

MAX 1

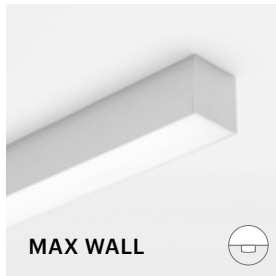

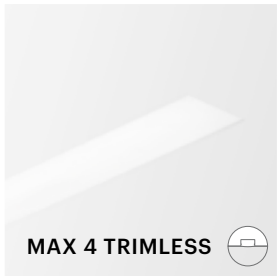

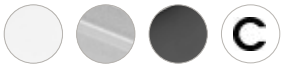

MAX 2

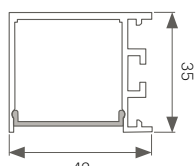

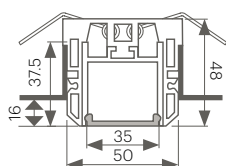

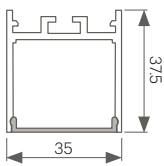

MAX 3

Available Finishes

Razor Max 3 & 4 are an excellent choice for commercial projects and offer the most flexibility for applications including surface mounted, recessed, suspended, wall mounted and trimless with a full complement of LED options (refer to the specifications at the back of the catalogue).

Razor Super Max

The Razor Super Max by Caribou is a collection of commercial grade linear profile systems custom fabricated to suit your project requirements. Available in a number of different sizes, outputs and finishes with various optional accessories including down lights, emergency lighting and speakers. Razor Super Max can be suspended, surface mounted, wall mounted or recessed.

Razor Super Max can be provided with a full complement of output options ranging from 11.6W (1485lm) /m through to our high output 44.1W (5239lm) /m. We'll have a suitable output solution for your project. All can be delivered with DALI dimming as an option.

Razor Super Max 35

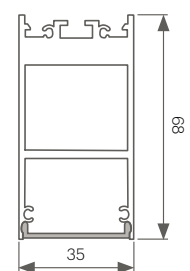

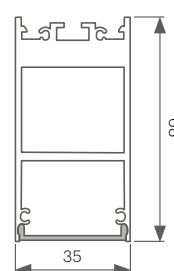

The Razor Super Max 35 by Caribou is a compact, high output linear extrusion system. Available in a variety of outputs, colour finishes and dimming options. Super Max 35 can be suspended or recessed.

Available Finishes

TIP: Razor Super Max can be provided in full lengths of up to 4800mm long. This is excellent in minimising joins along your system. However, for commercial projects, keep in mind height limitations with elevators if your project is located within a building.

TIP: Razor Super Max 35 is ideal for mounting between timber battens. Its slim design (35mm wide) can still accommodate all the versatility from the Caribou LED Board system to achieve just the right amount of light you need. Customers also choose to use Caribou's flexible LED strip inside Super Max 35 for a more value managed outcome.

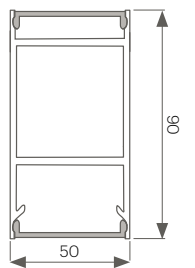

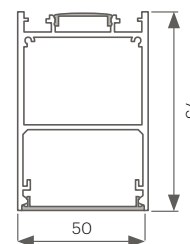

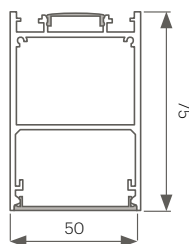

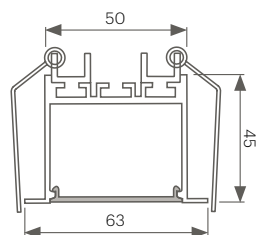

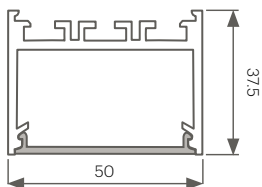

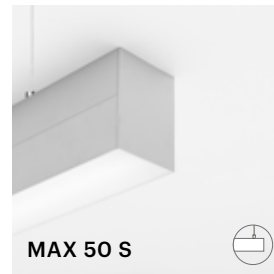

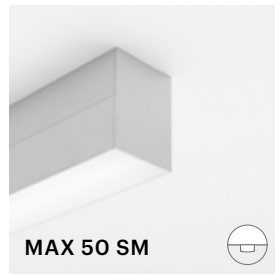

Razor Super Max 50

Razor Super Max 50 is a high output linear extrusion system designed for office applications. Available in an assortment of styles and options including recessed, suspended or surface mounted. Various outputs, colour finishes and dimming options available.

Available Finishes

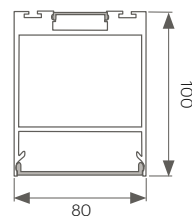

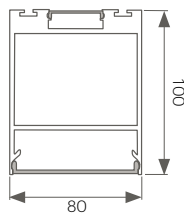

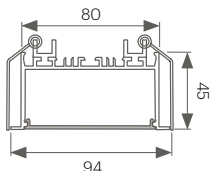

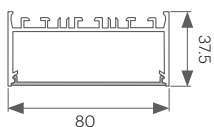

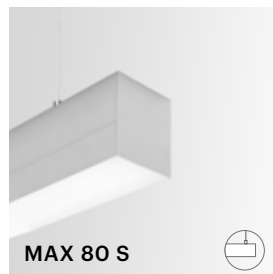

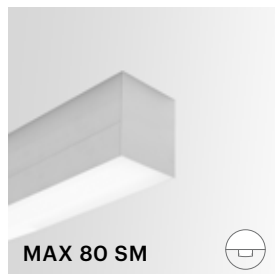

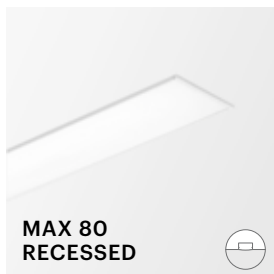

Available Accessory

Razor Super Max 80

Razor Super Max 80 is a high output linear extrusion system designed for office applications. Available in an assortment of styles and options.

ZigZag

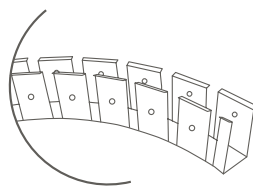

Don't be constrained by straight lines. Curves, corners and circles, our ZigZag does it all.

ZigZag is a flexible linear LED that can seamlessly follow architectural bends and curves.

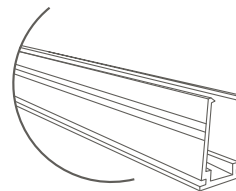

Our ZigZag is a problem solver; it can do what others can't. From illuminating angled inbuilt seating, bending around circular pillars, spiralling up and down steps and framing doorways to following the curves of a pool edge, the possibilities are endless.

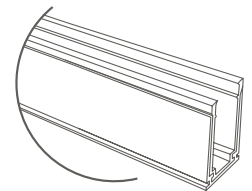

With no hot spots, direct uniform illumination and an IP68 rating, it's fit for almost anything. The possibility starts with you. Our ZigZag is up for the challenge.

Razor Pendants

CRIXUS

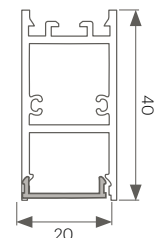

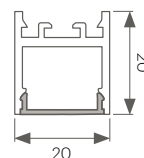

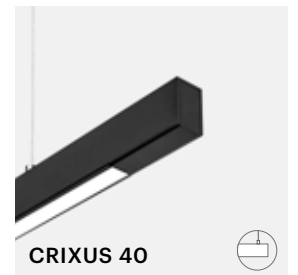

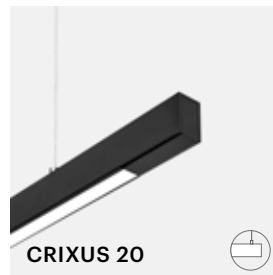

Crixus is a sleek custom linear profile system designed for residential, retail and light commercial applications. Designed to be either suspended or surface mounted and available with an assortment of outputs, colour finishes (including Anodised Brass or Bronze) and dimming options available.

Available Finishes

TIP: Did you know that we can custom finish your LED Profiles in a whole variety of different colours and finishes? Crixus 20 is most popular when finished in Anodised Brass. A very popular product for over kitchen island benches with the flexibility to choose your own length.

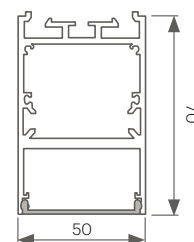

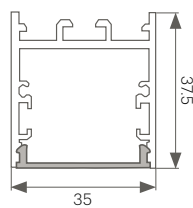

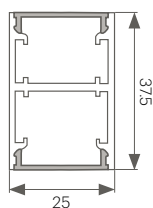

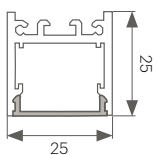

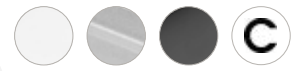

Crixus 40 has proven popular for apartments due to the compact design, making Crixus more proportional in size when installed over kitchens in smaller spaces.

Vermont Ring

The Vermont Ring by Caribou is a collection of circular rings to suit your project requirements. Available in a number of different sizes, outputs and finishes. Vermont Rings can be suspended and or surface mounted.

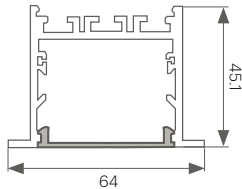

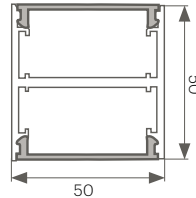

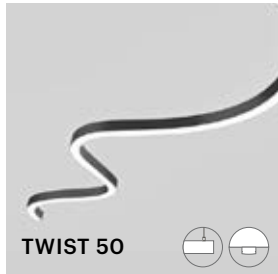

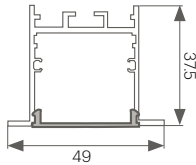

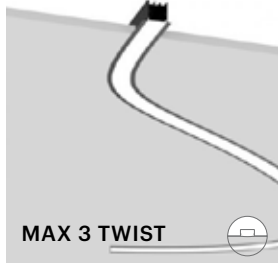

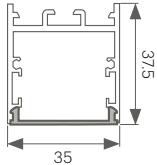

Available Finishes

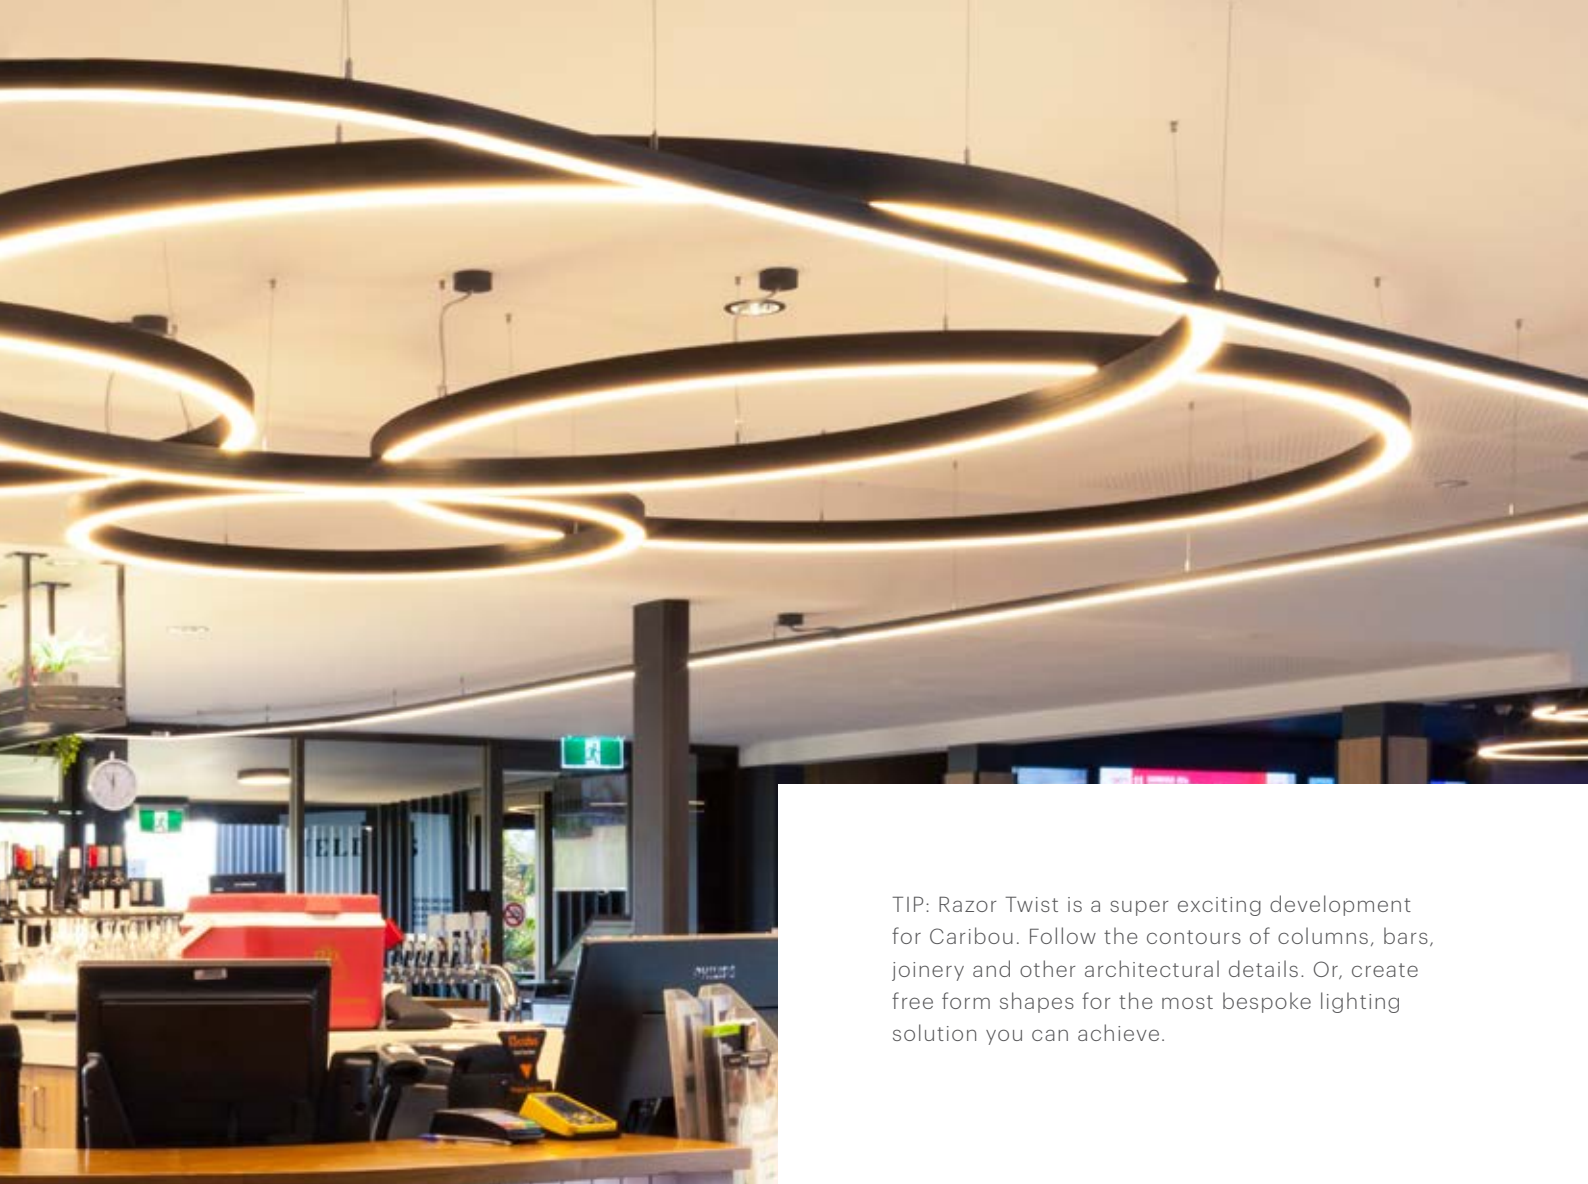

Razor Twist

The Razor Twist by Caribou is a collection of commercial grade linear profile systems custom curved to suit your project requirements. Available in a number of different sizes, outputs and finishes with various optional accessories including down lights, emergency lighting and speakers. Razor twist can be suspended, surface mounted, wall mounted or recessed.

Available Finishes

TIP: Razor Twist is a super exciting development for Caribou. Follow the contours of columns, bars, joinery and other architectural details. Or, create free form shapes for the most bespoke lighting solution you can achieve.

T H E

Black Edition

R A Z O R L E D B Y C A R I B O U

A mystical new diffuser that is available across the palette of our traditional Razor linear profiles. Black Edition provides a matte black aluminium profile with the dark diffuser that when illuminated still emits a white light. Perfect for installations on dark joinery or between timber battens. Also available across our Razor Max and Super Max profiles.

Available Finishes

From our Mini series to our Super Max series, there's a Black Edition profile to suit every project.

TIP: Use Black Edition with dark joinery for a sleek minimalistic look.

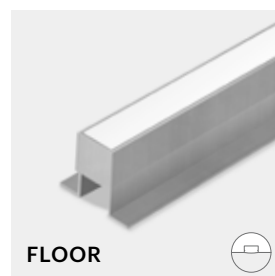

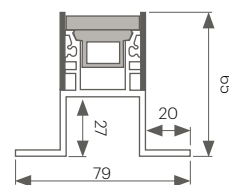

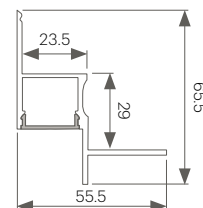

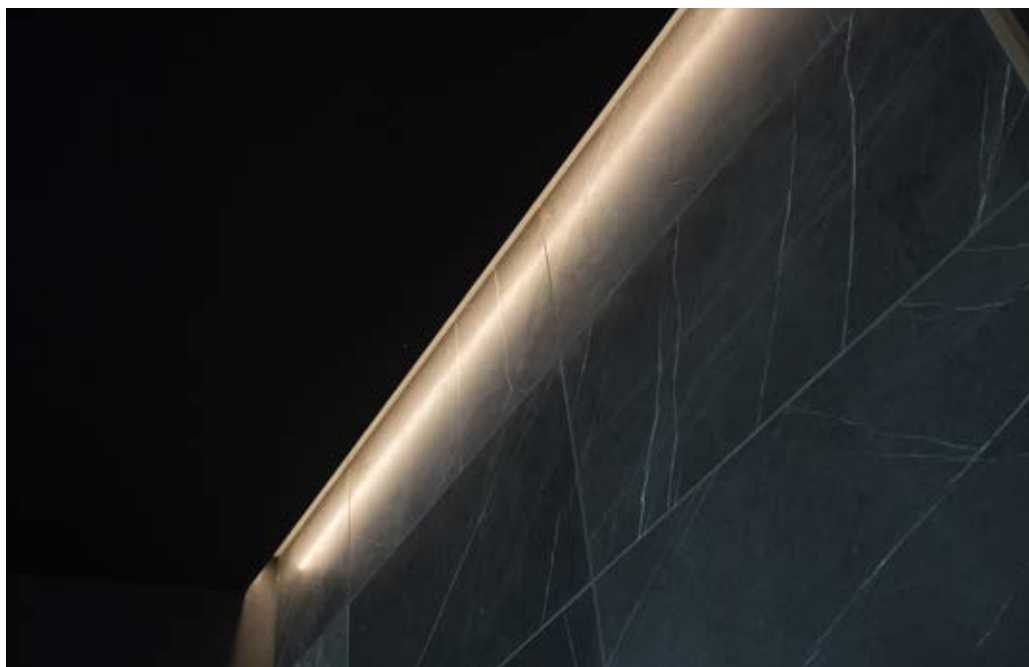

Black Edition

Razor Specialised

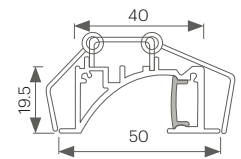

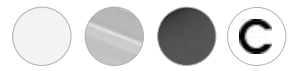

GRAZER, FLOOR,
WALL WASH & POOL

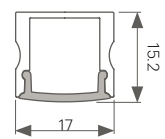

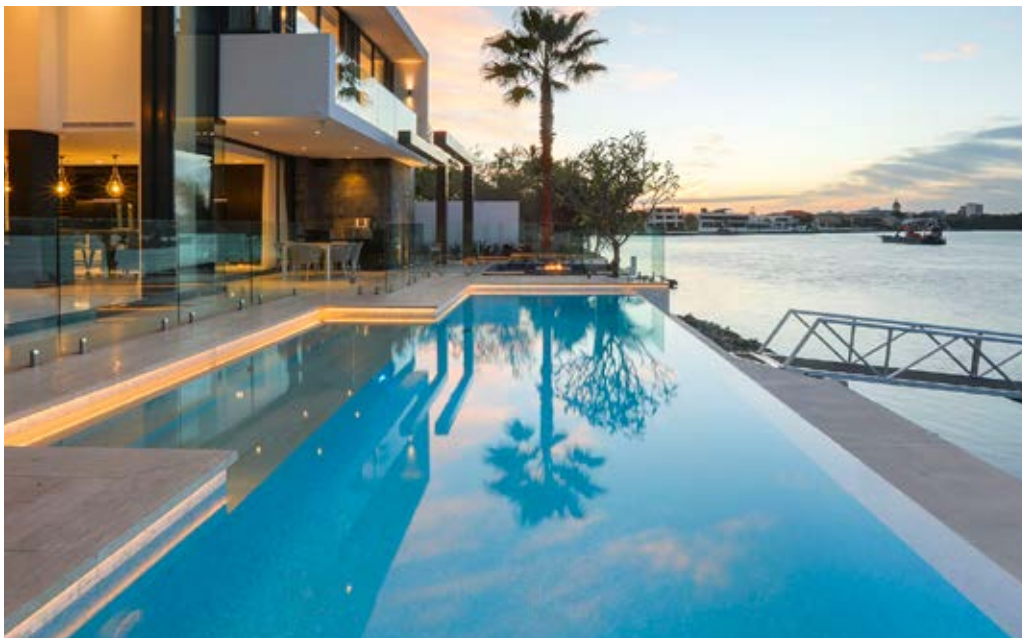

For those projects with distinctive applications needing specific solutions, we have crafted four unique linear LED

profiles. When you need an extraordinary product, Razor Specialised is here to help you achieve an extraordinary grand design.

Beam

Our Workshop Capabilities

The design opportunities surrounding the Caribou Razor systems are merely limited to your imagination. With over 65 different profiles, hundreds of colour options and a multitude of lighting possibilities available, Razor provides design professionals the chance to dream something unique and innovative for their next project. With all of our Razor profiles hand assembled in our Brisbane warehouse, custom is never far away.

Razor Plus Smarts

Take your Razor LED Profiles wireless with Caribou BT Mesh bluetooth wireless lighting controls. BT Mesh is based on Bluetooth Low Energy, the state-of-the-art wireless technology and the only low power wireless technology in all modern smartphones, tablets and

even smart watches, making it the only mainstream and future proof low power radio technology in the world. Control your lighting through wireless wall switches for a conventional switching experience or download the Caribou APP and control your lighting through your smart device.

Razor One of One

Let's make something no one's ever seen before. Your personal Razor co-creation starts here.

Individuality and creativity are so important. Razor One of One allows you to freely express yourself and create that signature piece for your project. We should all feel free to embrace our true selves through our creativity. Caribou can help you do just that. Appropriately named, the One of One collection, let Caribou create your special linear LED system with straight and curved lines or any angle of mitre for sharp corners.
